

# ENGAGEMENT IN GROWTH

Lanarca has strong experience working within Growth Points and Growth Areas. We have an effective working knowledge of current national, regional and specific sub regional planning and regeneration policy.

## MKSM—Growth Area

Lanarca worked alongside Northamptonshire County Council and the River Nene Regional Park partnership for a number of consecutive years, engaged on a variety of projects emerging as a response to the designation of the MKSM Growth Area. These included strategic stakeholder partnership brokering, working with key stakeholders including the (then) newly established Northamptonshire Development Companies. We also worked directly with the town's Borough Council acquiring and transparently expending Growth Area funding, and delivering green and economic infrastructure projects as the momentum of the Growth Area advanced.

## Black Country—Growth Point

Lanarca worked on behalf of the Black Country Consortium for three years on consecutive commissions including support for the Black Country's Growth Point award. Most recent work includes strategic stakeholder engagement planning, preparing sub regional regeneration investment planning mechanisms and providing support to set out next steps for the delivery of the Black Country's Programme of Development.

## Hinckley & Bosworth Borough—Growth Point

Lanarca worked closely with Hinckley & Bosworth Borough Council (HBBC) and key partners, including the LSP, to develop and deliver mechanisms through which the communities of Earl Shilton and Barwell were given an opportunity to understand, discuss and put forward views and opinions to inform proposed sustainable urban extensions. In order to develop an understanding of the issues associated with planned development, the project team devised key topics or themes, supported with accessible definitions, to be used throughout the pre-masterplanning public engagement programme.
